1 29. (New) The method of claim 28, further comprising:
2 hingedly connecting the first display to the second display.

Sub 92
1 30. (New) The method of claim 29, further comprising:
2 folding the first display onto the second display.

1 31. (New) The method of claim 30, further comprising:
2 folding the first and second displays onto the base unit to form a tablet
3 arrangement, wherein the first display remains exposed;
4 ~~receiving a pen-based input at the first display in the tablet arrangement.~~

C1
CMT
Sub 92
1 32. (New) The method of claim 26, further comprising:
2 displaying an image in the second display in response to the pen-based
3 ~~input at the first display.~~

1 33. (New) The method of claim 32, wherein providing the first display
2 comprises providing a conventional computer output display and providing the
3 second display comprises providing a pen-based input display.

1 34. (New) A computer system comprising:
2 a unit containing a keyboard;
3 a first display adapted to display a raster image, the first display facing in
4 a first direction; and
5 a second display adapted to receive a pen-based input, the second display
6 facing substantially in the first direction,
7 wherein the unit is separate from the first and second displays.

Sub 93
1 35. (New) The computer system of claim 34, further comprising:
2 ~~at least one hinge to couple one of the first and second displays to the unit.~~

1 36. (New) The computer system of claim 35, wherein the unit comprises a
2 base unit of a laptop computer.

Sub D4
1 37. ~~(New) The computer system of claim 34, wherein the first display is~~
2 ~~hingedly connected to the second display.~~

CI added
1 38. (New) The computer system of claim 37, wherein the unit is hingedly
2 connected to the first display, and
3 wherein the first display and second display are foldable onto the
4 keyboard to provide a pen-based tablet arrangement in which the second display
5 remains exposed and is adapted to receive the pen-based input.

Sub D5
1 39. ~~(New) The computer system of claim 34, wherein the unit is adapted to~~
2 ~~receive an indication of the pen-based input from the second display.~~

1 40. (New) The computer system of claim 39, wherein the unit is adapted to
2 receive input from the keyboard.
